This textbook will help you learn all the skills you need to pass all Vehicle Electrical and Electronic Systems courses and qualifications. As electrical and electronic systems become increasingly more complex and fundamental to the workings of modern vehicles, understanding these systems is essential for automotive technicians. For students new to the subject, this book will help to develop this knowledge, but will also assist experienced technicians in keeping up with recent technological advances. This new edition includes information on developments in pass-through technology, multiplexing, and engine control systems. In full colour and covering the latest course specifications, this is the guide that no student enrolled on an automotive maintenance and repair course should be without.

touchstone for many others. The Long Hello explores the emotional rewards and challenges that Cathie Borrie experienced in caring for her mother, who was living with Alzheimer ' s disease, for seven years. Between the two, a wondrously poetic dialogue develops, which Ms. Borrie further illuminates with childhood memories of her family, and her struggle to maintain a life outside her caregiving responsibilities. The Long Hello demonstrates how caregiving creates an opportunity to experience the change in a relationship that illness necessitates, one in which joy, meaning, and profound intimacy can flourish. Written in spare, beautiful prose, largely in the form of a dialogue, The Long Hello exquisitely captures the intricacies and nuances of a daughter ' s relationship with her mother.
