~~IDC's Carrier Network Infrastructure service analyzes emerging opportunities and threats facing carrier networks as they embark on digital transformation. Network vendors seek to stay relevant as information and communication technology (ICT) vendors in the digital transformation journey. The service focuses on adoption trends in transforming fixed-line and mobile network infrastructure.~~

### ~~Carrier Network Infrastructure~~

~~Since fiber can carry much more information than copper, carrier Ethernet service providers typically use fiber to transport high-speed traffic (usually 1 Gbit/s or more) over long distances or within the network core. Fiber is used with SONET/SDH, dense wavelength-division multiplexing (DWDM) or optical transport networks (OTNs).~~
