Principles Of Fracture Management

The AO Principles of Fracture Management has served many generations of surgeons around the world as the source of knowledge and essential reference in the field of orthopedic trauma surgery. The fundamental principles of fracture surgery have not changed in 60 years, but the biological and clinical knowledge, as well as technological advancements have extended new possibilities in surgical treatment and offered surgeons the opportunity to explore new ways of applying the AO principles.

AO Principles of Fracture Management, Third Edition builds ...

The AO classification of fracture wound severity provides a grading system for injuries of each of the skin (I), muscles and tendons (MT), and neurovascular (NV), each of which is divided into five degrees of severity. It is designed to provide a unique, unequivocal definition of any injury and, thereby, allows accurate comparison of cases.

The main principle in any reduction, regardless of the method employed, is to correct the deforming forces that resulted in the injury. Prior to this, some clinicians may suggest an initial exaggeration of the fracture, before the definitive reduction manoeuvre, aiding to uncouple the proximal and distal fracture fragments.
