explores the profound ethical and social consequences of today's biotechnical revolution. Almost every week brings news of novel methods for screening genes and testing embryos, choosing the sex and modifying the behavior of children, enhancing athletic performance, slowing aging, blunting painful memories, brightening mood, and altering basic temperaments. But we must not neglect the fundamental question: Should we be turning to biotechnology to fulfill our deepest human desires? We want better children -- but not by turning procreation into manufacture or by altering their brains to gain them an edge over their peers. We want to perform better in the activities of life -- but not by becoming mere creatures of chemistry. We want longer lives -- but not at the cost of becoming so obsessed with our own longevity that we care little about future generations. We want to be happy --

In Beyond Therapy, Erving Polster examines the role of "life focus" in three of society's most familiar activities: ordinary conversation, the arts, and religion. He shows the life focus movement to be an indivisible complement to just simply living. In proposing a paradigm shift from psychotherapy's priority for changing people's troubled lives into the complementary purpose of illuminating their lives, the author invites the participation of many people who do not seek remedial treatment for emotional or psychological problems. Polster incorporates a broader scenario for enhancing attention through community groups, showing that the convergence of people's minds on commonly important life themes creates enlightenment. This interlocked focus amplifies the ensuing conversational content and creates a meditation-like absorption. This kind of pointed focus, argues Polster, has the power to color the lives of the participants. This work offers rationale and design for life focus community groups, and also creates a heightened identity for the life focus movement, providing other foundational ideas that help to unify diverse approaches. Mental health professionals will benefit from its wealth of specific exercises and instructions for program design. Polster provides leaders and group members with a well-rounded perspective on the basics of personal enlightenment and communal belonging.

Charlie Brown and the gang explore the world of psychotherapy in excerpts from the "Peanuts" comic strip

This book is presented in three sections: I. "The rise and demise of a psychotherapist," a personal story of concluding that the scientific assumptions on which it is based prevent psychotherapy from facilitating true healing and is institutionalized co-dependence; II. a discussion of the living in process model developed by Schaeef to facilitate true healing at all levels of being and; III. a philosophical exploration of mechanistic and post modernist science and their relationship to the healing professions.

Applicable at many levels - the personal, professional, scientific, political, and philosophical - Beyond Therapy, Beyond Science offers not only a method but also a process for evolving solutions in a world constrained by the scientific worldview. With Beyond Therapy, Beyond Science Schaeef again shows herself to be one of the most creative thinkers of our time, taking a field she has loved - psychotherapy - and using it as a springboard for rethinking ourselves and our world. A crucial work by a trenchant thinker, Beyond Therapy, Beyond Science will inspire thought, ignite controversy, and, most importantly, facilitate healing.

NAMED A BEST BOOK OF 2020 BY NPR, PEOPLE, AND O, THE OPRAH MAGAZINE A NEW YORK TIMES CRITICS' TOP BOOK OF 2020 NATIONAL BESTSELLER "As good as The Friend, if not better." "The New York Times "Impossible to put down . . . leavened with wit and tenderness." "People "I was dazed by the novel's grace." "The New Yorker The New York Times"bestselling, National Book Award-winning author of The Friend brings her singular voice to a story about the meaning of life and death, and the value of companionship A woman describes a series of encounters she has with various people in the ordinary course of her life: an ex she runs into by chance at a public forum, an Airbnb owner unsure how to interact with her guests, a stranger who seeks help comforting his elderly mother, a friend of her youth now hospitalized with terminal cancer. In each of these people the woman finds a common need: the urge to talk about themselves and to have an audience to their experiences. The narrator orchestrates this chorus of voices for the most part as a passive listener, until one of them makes an extraordinary request, drawing her into an intense and transformative experience of her own. In What Are You Going Through, Nunez brings wisdom, humor, and insight to a novel about human connection and the changing nature of relationships in our times. A surprising story about empathy and the unusual ways one person can help another through hardship, her book offers a moving and provocative portrait of the way we live now.

A collection of essays by psychologists about the psychology of well-being. It shows how the literature of the spiritual traditions, especially Buddhism, can be of enormous help in understanding the concept of well-being and in developing practices that enhance it. It shows how spiritual ideas are echoed in the theories and techniques of contemporary psychology and psychotherapy. It explores the nature of the new therapies and new religious movements which attempt to combine ancient and modern wisdoms about well-being. It also discusses some of the important issues and questions concerning the use of the spiritual traditions in working with distressed people in a variety of settings.
