From the American Library Association's website: "A challenge is an attempt to remove or restrict materials, based upon the objections of a person or group. A banning is the removal of those materials. Challenges do not simply involve a person expressing a point of view; rather, they are an attempt to remove material from the curriculum or library, thereby restricting the access of others."

In 1950 Ruth W. Brown, librarian at the Bartlesville, Oklahoma, Public Library, was summarily dismissed from her job after thirty years of exemplary service, ostensibly because she had circulated subversive materials. In truth, however, Brown was fired because she had become active in promoting racial equality and had helped form a group affiliated with the Congress of Racial Equality. Louise S. Robbins tells the story of the political, social, economic, and cultural threads that became interwoven in a particular time and place, creating a strong web of opposition. This combination of forces ensnared Ruth Brown and her colleagues-for the most part women and African Americans-who championed the cause of racial equality. This episode in a small Oklahoma town almost a half-century ago is more than a disturbing local event. It exemplifies the McCarthy era, foregrounding those who labored for racial justice, sometimes at great cost, before the civil rights movement. In addition, it reveals a masking of concerns that led even Brown ' s allies to obscure the cause of racial integration for which she fought. Relevant today, Ruth Brown ' s story helps us understand the matrix of personal, community, state, and national forces that can lead to censorship, intolerance, and the suppression of individual rights.

By placing its professional expertise in the service of maintaining the democratic values of free expression and pluralism, American librarianship not only defended its professional autonomy in the area of book selection, but also developed an ideology of intellectual freedom and claimed its defense as a central jurisdiction. Through extensive use of primary source material, this volume charts the library profession's journey from the adoption of the 1939 Library's Bill of Rights to the 1969 development of the Freedom to Read Foundation. The book argues that the ALA was reluctant to fund support for intellectual freedom, and that the ALA's executive board was extremely cautious and seldom took leadership in intellectual freedom matters.
