the paradigm for contracts in general. Moreover, it is also probably the most common contract, and certainly the most common consumer contract, that there is. In fact, sales come in all shapes and sizes: ranging from the purchase of the daily newspaper at the news-stand or the groceries in the supermarket, through to the purchase of a new car and to commodity sales on highly specialised markets. Furthermore, there are many mixed transactions that contain a certain element of sale, such as distribution contracts or all sorts of manufacturing contracts.

extremely simple abstract programming language. The succeeding parts demonstrate the performance of abstract programming language using a macro expansion technique, along with presentations of the regular and context-free languages. Other parts deal with the aspects of logic that are important for computer science and the important theory of computational complexity, as well as the theory of NP-completeness. The closing part introduces the advanced recursion and polynomial-time computability theories, including the priority constructions for recursively enumerable Turing degrees. This

As the field of FinTech continues its progress, financial institutions must not only enhance their digitization, but also make serious efforts to understand the resulting new opportunities it creates. In line with these developments, TABF has published the book Basic knowledge on FinTech, which was designed by us as a reference for the FinTech Knowledge Test. Co-authored by TABF staff and other experts, it features balanced and credible analysis,
