Civilization Quotes by Niall Ferguson - Goodreads The West once ruled more than half the world. The religion it exported, Christianity, is still followed by a third of mankind. Above all, the way people live - or aspire to live - is unmistakably an invention of the West. All over the world, more and more humans eat a Western diet, wear Western clothes and live in Western housing.

From the bestselling author of The Ascent of Money and The Square and the Tower Western civilization 's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. DAILY TELEGRAPH BOOKS OF THE YEAR If in the year 1411 you had been able to circumnavigate the globe, you would have been most impressed by the dazzling civilizations of the Orient. The Forbidden City was under construction in Ming Beijing; in the Near East, the Ottomans were closing in on Constantinople. By contrast, England would have struck you as a miserable backwater ravaged by plague, bad sanitation and incessant war. The other quarrelsome kingdoms of Western Europe - Aragon, Castile, France, Portugal and Scotland - would have seemed little better. As for fifteenth-century North America, it was an anarchic wilderness compared with the realms of the Aztecs and Incas. The idea that the West would come to dominate the Rest for most of the next half millennium would have struck you as wildly fanciful. And yet it happened. What was it about the civilization of Western Europe that allowed it to trump the outwardly superior empires of the Orient? The answer, Niall Ferguson argues, was that the West developed six "killer applications" that the Rest lacked: competition, science, democracy, medicine, consumerism and the work ethic. The key question today is whether or not the West has lost its monopoly on these six things. If so, Ferguson warns, we may be living through the end of Western ascendancy. Civilization takes readers on their own extraordinary journey around the world - from the Grand Canal at Nanjing to the Topkapi Palace in Istanbul, from Machu Picchu in the Andes to Shark Island, Namibia; from the proud towers of Prague to the secret churches of Wenzhou. It is the story of sailboats, missiles, land deeds, vaccines, blue jeans and Chinese Bibles. It is the defining narrative of modern world history.

Understand where we came from. Whether you're an avid student of the Bible or a skeptic of its relevance, The Book That Made Your World will transform your perception of its influence on virtually every facet of Western civilization. Indian philosopher Vishal Mangalwadi reveals the personal motivation that fueled his own study of the Bible and systematically illustrates how its precepts became the framework for societal structure throughout the last millennium. From politics and science, to academia and technology, the Bible's sacred copy became the key that unlocked the Western mind. Through Mangalwadi's wide-ranging and fascinating investigation, you'll discover what triggered the West's passion for scientific, medical, and technological advancement How the biblical notion of human dignity informs the West's social structure and how it intersects with other worldviews How the Bible created a fertile ground for women to find social and economic empowerment How the Bible has uniquely equipped the West to cultivate compassion, human rights, prosperity, and strong families The role of the Bible in the transformation of education How the modern literary notion of a hero has been shaped by the Bible's archetypal protagonist Journey with Mangalwadi as he examines the origins of a civilization's greatness and the misguided beliefs that threaten to unravel its progress. Learn how the Bible transformed the social, political, and religious institutions that have sustained Western culture for the past millennium, and discover how secular corruption endangers the stability and longevity of Western civilization. Endorsements: " This is an extremely significant piece of work with huge global implications. Vishal brings a timely message. " (Ravi Zacharias, author, Walking from East to West and Beyond Opinion) " In polite society, the mere mention of the Bible often introduces a certain measure of anxiety. A serious discussion on the Bible can bring outright contempt. Therefore, it is most refreshing to encounter this engaging and informed assessment of the Bible 's profound impact on the modern world. Where Bloom laments the closing of the American mind, Mangalwadi brings a refreshing optimism. " (Stanley Matton, founder and president, C. S. Lewis Foundation) " Vishal Mangalwadi recounts history in very broad strokes, always using his cross-cultural perspectives for highlighting the many benefits of biblical principles in shaping civilization. " (George Marsden, professor, University of Notre Dame; author, Fundamentalism and American Culture)

"In this wonderful book, Thomas Patterson effectively dethrones the concept of 'civilization' as an abstract good, transcending human society."--Martin Bernal Drawing on his extensive knowledge of early societies, Thomas C. Patterson shows how class, sexism, and racism have been integral to the appearance of "civilized" societies in Western Europe. He lays out clearly and simply how civilization, with its designs of "civilizing" and "being civilized," has been closely tied to the rise of capitalism in Western Europe and the development of social classes.

The year is 2383, and the world is almost unrecognizable. Clear warnings of climate catastrophe went ignored for decades, leading to soaring temperatures, rising sea levels, widespread drought and—finally—the disaster now known as the Great Collapse of 2093, when the disintegration of the West Antarctica Ice Sheet led to mass migration and a complete reshuffling of the global order. Writing from the Second People's Republic of China on the 300th anniversary of the Great Collapse, a senior scholar presents a gripping and deeply disturbing account of how the children of the Enlightenment—the political and economic elites of the so-called advanced industrial societies—failed to act, and so brought about the collapse of Western civilization. In this haunting, provocative work of science-based fiction, Naomi Oreskes and Eric M. Conway imagine a world devastated by climate change. Dramatizing the science in ways traditional nonfiction cannot, the book reasserts the importance of scientists and the work they do and reveals the self-serving interests of the so-called "carbon combustion complex" that have turned the practice of science into political fodder. Based on sound scholarship and yet unafraid to speak boldly, this book provides a welcome moment of clarity amid the cacophony of climate change literature.
