CARB has verified Engine Control Systems Combifilter for 2007 or older model year diesel engines used in off-road applications operating on standard ultra low sulfur diesel fuel or bio-diesel (B20). The Combifilter system employs an actively regenerated uncatalyzed diesel particulate filter to achieve a 85 percent reduction in particulate matter emissions, qualifying it for a Level 3 verification.

# Download Free Engine Control Systems Arb

module or powertrain control module, is a type of electronic control unit that controls a series of actuators on an internal combustion engine to ensure optimal engine performance. It does this by reading values from a multitude of sensors within the engine bay, interpreting the data using multidimensional performance maps, and adjusting the engine actuators. Before ECUs, air – fuel mixture, ignition timing, and idle speed were ...

Following the identification of diesel particulate matter as a toxic air contaminant (TAC) in 1998, the California Air Resources Board (ARB) developed a comprehensive strategy to control diesel PM emissions.

Emission Standards: USA:

California Diesel Risk Reduction ...

In the field of mobile source emission control, liquid hydrocarbons adsorbed on the carbon particles in engine exhaust are referred to as the soluble organic fraction (SOF)- the soluble part of the particulate matter in the exhaust.
