Accounting Theory 5th edition is the new edition of the market leading theory textbook. The 5th edition has been updated to enhance student understanding of the role of accounting theory and the application of accounting theory in the professional environment. Increasingly, students have failed to appreciate the relevance of studying accounting theory due to the esoteric nature of the discipline and its lack of any obvious correlation to a discrete accounting process. The new edition addresses this issue and makes the link to industry more clear through chapter vignettes and case studies. The new edition goes further to align the study of accounting theory to the professional environment domestically and internationally. To achieve this, the new edition includes a "International View" vignette in each chapter to profile the international response or thinking on relevant issues, 'Theory in Action' boxes illustrate the chapter material by way of presenting professional examples to build understanding and end of chapter case studies have develop and apply student understanding of the material. The new edition continues to provide the latest research and the most comprehensive discussion of material whilst maintaining its critical perspective.

Seminar paper from the year 2002 in the subject Business economics - Controlling, grade: 1,0, University of Hannover (Lehrstuhl für Controlling), course: Seminar zur "Financial Accounting Theory", 25 entries in the bibliography, language: English, abstract: This paper studies the decision-usefulness of accounting information and the implications of financial reports, especially against the background of efficient securities markets. The decision-usefulness of financial statements gained in importance in the literature of accounting research due to the decline in helpfulness for decision taking of traditional financial statements like earnings, cash flows and stock returns.¹ This deterioration is accompanied by a deficit of future-oriented indicators, in particular intangible assets, which are not integrated in the actual financial reporting requirements.² These outstanding problems lead to incompleteness of capital markets, which are tried to be solved by different mechanisms, e.g. penalties, incentives and voluntary disclosure, to attain to efficient securities markets, the social advantageous solution.³ Section 2 describes the requirements of efficient securities markets, its various forms and the origin of inefficient working securities markets. Chapter 3 illustrates the usefulness of financial statements for different constituencies, especially for investors and management, and the legal standards for mandatory disclosure. Division 4 expresses the information dilemma and presents diverse solutions for an approximation to social optimal allocations, i.e. allocations that diminish securities markets inefficiencies. Chapter 5 gives a short summary of this paper. ¹ See LEV / ZAROWIN (Boundaries of Financial Reporting 1999), pp. 354 – 362. ² See GÜNTHER / BEYER (Value Based Reporting 2001), pp. 1627 – 1629. ³ See SCOTT (Financial Accounting Theory 1997), pp. 81 – 82.
