Firewall Fundamentals Cisco Press - wcfco.co.za

NOTE. The VLAN-Groups for the FWSM can be created using either the firewall vlan-group or the svclc vlan-group command. VLAN-Groups created using the svclc vlan-group command can be associated not only with the FWSM but also with a Cisco Application Control Engine (ACE) services module. (This is required when an ACE module resides in the same chassis and needs to communicate with the FWSM.)
