~~The Floating Drydock~~

Auxiliary floating drydock are US Navy floating dry docks that are able to submerge under water and be placed under a ship in need of repair below the water line. Floating drydocks then rise up under the ship raising the ship out of the water. The ship is now blocked on the deck of the floating dry dock for repair. Most floating drydocks had no engine and

The principal such facility, the floating dry dock, is a trough-shaped cellular structure, used to lift ships out of the water for inspection and repairs. The ship is brought into the channel of the partly submerged dock, which is then floated by removing ballast from its hollow floor and walls...

~~Floating dry dock +
Britannica~~

A floating dry dock is a type of pontoon for dry docking ships, possessing floodable buoyancy chambers

Download Free Floating Dry Dock Manual

and a "U"-shaped cross-section. The walls are used to give the dry dock stability when the floor or deck is below the surface of the water. When valves are opened, the chambers fill with water, causing the dry dock to float lower in the water.

~~Dry dock — Wikipedia~~

Floating docks from EZ Dock are well-suited to maritime environments and can adapt to changing tidal levels, waves, and currents. Even if your seabed is muddy, rocky or uneven, our boat docks are unaffected, providing a stable launch point for your next ocean adventure. EZ
