Veronica Henry, author of *A Night on the Orient Express*.

"There is no one quite like Barbara Kingsolver in contemporary literature," raves the *Washington Post Book World*, and it is right. She has been nominated three times for the ABBY award, and her critically acclaimed writings consistently enjoy spectacular commercial success as they entertain and touch her legions of loyal fans. In *High Tide in Tucson*, she returns to her familiar themes of family, community, the common good and the natural world. The title essay considers Buster, a hermit crab that accidentally stows away on Kingsolver's return trip from the Bahamas to her desert home, and turns out to have manic-depressive tendencies. Buster is running around for all he's worth -- one can only presume it's high tide in Tucson. Kingsolver brings a moral vision and refreshing sense of humor to subjects ranging from modern motherhood to the history of private property to the suspended citizenship of human beings in the Animal Kingdom. Beautifully packaged, with original illustrations by well-known illustrator Paul Mirocha, these wise lessons on the urgent business of being alive make it a perfect gift for Kingsolver's many fans.

The signs are there: our coastal cities are increasingly susceptible to flooding as the climate changes. Charleston, South Carolina, is no exception, and is one of the American cities most vulnerable to rising sea levels. *Lowcountry at High Tide* is the first book to deal with the topographic evolution of Charleston, its history of flooding from the seventeenth century to the present, and the efforts made to keep its populace high and dry, as well as safe and healthy. For centuries residents have made many attempts, both public and private, to manipulate the landscape of the low-lying peninsula on which Charleston sits, surrounded by wetlands, to maximize drainage, and thus buildable land and to facilitate sanitation. Christina Butler uses three hundred years of archival records to show not only the alterations to the landscape past and present, but also the impact

those efforts have had on the residents at various socio-economic levels throughout its history. Wide-ranging and thorough, *Lowcountry at High Tide* goes beyond the documentation of reclamation and filling and offers a look into the life and the history of Charleston and how its people have been affected by its unique environment, as well as examining the responses of the city over time to the needs of the populace. Butler considers interdisciplinary topics from engineering to public health, infrastructure to class struggle, and urban planning to civic responsibility in a study that is not only invaluable to the people of Charleston, but for any coastal city grappling with environmental change. Illustrated with historical maps, plats, and photographs and organized chronologically and thematically within chapters, *Lowcountry at High Tide* offers a unique look at how Charleston has kept—and may continue to keep—the ocean at bay.

Adam Malfitan still has nightmares about the night his girlfriend, Mitzi, died. He sees the blood. He sees her in the water. He is a lifeguard, and he can't save her. He wakes up screaming, but the terror is just beginning.

From the New York Times bestselling author of *The Weekenders* comes a delightful new novel about new love, old secrets, and the kind of friendship that transcends generations. When ninety-nine-year-old heiress Josephine Bettendorf Warrick summons Brooke Trappnell to Talisa Island, her 20,000 acre remote barrier island home, Brooke is puzzled. Everybody in the South has heard about the eccentric millionaire mistress of Talisa, but Brooke has never met her. Josephine's cryptic note says she wants to discuss an important legal matter with Brooke, who is an attorney, but Brooke knows that Mrs. Warrick has long been a client of a prestigious Atlanta law firm. Over a few meetings, the ailing Josephine spins a tale of old friendships, secrets, betrayal and a long-unsolved murder. She tells Brooke she is hiring her for two reasons: to protect her island and legacy from those who would despoil her land, and secondly, to help her make amends with the heirs of the long dead women who were her closest friends, the girls of The High Tide Club—so named because of their youthful skinny dipping escapades—Millie, Ruth and Varina. When Josephine dies with her secrets intact, Brooke is charged with contacting Josephine's friends' descendants and bringing them together on Talisa for a reunion of women who've actually never met. The High Tide Club is Mary Kay Andrews at her *Queen of the Beach Reads* best, a compelling and witty tale of romance thwarted, friendships renewed, justice delivered, and true love found. Praise for *The Weekenders*: "This book has all the makings of a beach read...The perfect blend of drama, humor, intrigue, and just a touch of murder." —Bustle "Andrews has this 'perfect beach read' label down pat—and then some. *The Weekenders* is not just good, it is beyond good... Summer doesn't truly begin without a Mary Kay Andrews book in your beach bag, so here is another winner and Top Pick just for you." —RT Book Reviews (Top Pick) "Andrews' novels...are the epitome of

Horseshoe crabs, shorebirds, and humans converge in a frenzy of activity. Every spring millions of horseshoe crabs crawl to the beaches of Delaware Bay to lay their eggs. But they aren't the only ones crowding ashore. Flocks of shorebirds migrating north from South America stop to feed on the horseshoe crab eggs. People also flock to the scene. Scientists and tourists turn out to see the spectacle and learn more about the creatures that call this habitat home for a few weeks. Alan Marks' gorgeous paintings bring the reader down to the shoreline to observe this exciting annual event that interconnects species in a web of life and an ancient food chain.
