En 1994 la FAO publicó "Manejo de malezas para países en desarrollo" (Estudio FAO: Producción y protección vegetal No 120), poniendo a disposición del público una importante información sobre control de malezas. Dado que desde esa fecha ha habido una evolución técnica constante en materia de manejo de malezas, la FAO ha actualizado en esta nueva publicación la información actualmente disponible. La publicación contiene información sobre bioecología y problemas de las malezas y varias estrategias de control. El manejo de las malezas debe concordar con los problemas específicos que se plantean en el campo y, por lo tanto, cierto conocimiento básico sobre la bioecología de las malezas es necesario para manejar correctamente la infestación en el campo.
