#1 New York Times Bestseller “Significant...The book is both instructive and surprisingly moving.” –The New York Times Ray Dalio, one of the world’s most successful investors and entrepreneurs, shares the unconventional principles that he’s developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine’s list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater’s exceptionally effective culture, which he describes as “an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency.” It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In Principles, Dalio shares what he’s learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book’s hundreds of practical lessons, which are built around his cornerstones of “radical truth” and “radical transparency,” include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as

creating “baseball cards” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they’re seeking to achieve. Here, from a man who has been called both “the Steve Jobs of investing” and “the philosopher king of the financial universe” (CIO magazine), is a rare opportunity to gain proven advice unlike anything you’ll find in the conventional business press.

A story, based on real events, about a boy and a half-Arabian mare who enter the Palio, an annual race in Siena, Italy, with all the pageantry of a medieval contest.

The multi-volume Encyclopedia of Global Religion provides a comprehensive overview of the globalization of religious culture and society around the world in both its historical and contemporary aspects. The encyclopedia includes topics related to the diaspora of cultures and dispersions of peoples; the transitional aspects of religious ideas and practices; the cultural diversity of religious traditions; and the responses of religion—both negative and positive—to multicultural society. The volumes include essays on the contemporary religious society of every country in the world. The contributors to the encyclopedia are leading authorities on these topics from around the world. The editors, Mark Juergensmeyer and Wade Clark Roof., are sociologists of religion at the University of California, Santa Barbara.

In this fifth edition of the bestselling text in organizational theory and behavior, Bolman and Deal’s update includes coverage of pressing issues such as globalization, changing workforce, multi-cultural and virtual workforces and communication, and sustainability. A full instructor support package is available including an instructor’s guide, summary tip sheets for each chapter, hot links to videos & extra resources, mini-assessments for each of the frames, and podcast Q&As with Bolman & Deal.

The first book in over twenty-five years devoted solely to allegory and personification in art history, this anthology complements current literary and cultural studies of allegory. The volume re-examines early modern allegorical imagery in light of crucial material, contextual and methodological questions: how are allegories conceived; for whom; and for what purposes? Contributors consider a wide range of allegorical representations in the visual arts and material culture, of both early modern Europe and the colonial “New World” 1400–1800. Essays included here examine paintings, sculpture, prints, architecture and the spaces of public ritual while discussing the

process and theory of interpretation, formation of audiences, reception history, appropriation and censorship. A special focus on the medium of the body in visual allegory unites the volume's diverse materials and methods.

An entertaining, illustrated adaptation of Ray Dalio's *Principles*, the #1 New York Times bestseller that has sold more than two million copies worldwide. *Principles for Success* distills Ray Dalio's 600-page bestseller, *Principles: Life & Work*, down to an easy-to-read and entertaining format that's accessible to readers of all ages. It contains the key elements of the unconventional principles that helped Dalio become one of the world's most successful people—and that have now been read and shared by millions worldwide—including how to set goals, learn from mistakes, and collaborate with others to produce exceptional results. Whether you're already a fan of the ideas in *Principles* or are discovering them for the first time, this illustrated guide will help you achieve success in having the life that you want to have.

Africa is a complicated place, and the Peace Corps Volunteers who have worked in 43 African nations have seen it all: from public executions to public celebrations to life in a time of AIDS. This heartfelt collection is the first of its kind to chronicle 50 years of Peace Corps service. Stories range from poignant to hilarious, involve political intrigue and cultural missteps, illuminating the joys and agony of volunteering abroad and representing the United States in the process. Sixty stories provide a broad overview and give readers a glimpse into the life and times of these brave volunteers, who each learned at least one new language and went to work in the villages and cities from Morocco to South Africa. They worked hard, too. But in these stories you will see that they also danced, faced death by elephant, and witnessed unbearably grim events. One is admired for her "big butt," another reminded that he had taught proper police procedure in a time of civil unrest. Saying "I was there" is sometimes a bittersweet declaration.

In *How to Super Tune and Modify Holley Carburetors*, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your performance application.

By analysing the rationales for sustainability strategies, this book addresses a timely question for managers, academics and MBAs: 'when does it pay to be green?' Based on solid theoretical foundations and empirical research, it clarifies the elements involved in the formation and evaluation of sustainability strategies in firms.
