edition) | Open Library

Microeconomics has become a market leader because Perloff presents theory in the context of real, data-driven examples, and then develops intuition through his hallmark Solved Problems.

Students gain a practical perspective, seeing how

models connect to real-world decisions being made in today ' s firms and policy debates.

There are everyday problems: What is the social cost of legislation enforcing below-market prices, minimum wages, milk regulation, and noncompetitive pricing? Why are matinee movies cheaper than

And then there are broader questions: What is the patent system's role in the market for intellectual property rights? How does one think about externalities like airport noise? Is the free market, a regulated solution, or tort law the best way to deliver the "efficient amount of harm" in the workplace?

As part of its review of competition law that started in the late 1990s, the European Commission proposes to revise its interpretation and application of the Treaty ' s prohibition of abuses of dominant positions. Also, it has instigated a debate about the promotion of private enforcement of EC competition law. On

While many
veterinarians choose to
believe that expertise in
medicine necessarily
precludes having

Online Library Microeconomic

business sense, nothing could be further from the truth. In fact, business and medicine are both evidence-based disciplines with much in common. When a patient is sick, we used standard algorithms to determine the most likely causes, and run appropriate diagnostic tests. We do the same thing with a business

Online Library Microeconomic

that is in failing health. We might run an inventory audit instead of a radiograph, or look at financial statements rather than laboratory results, but the problem-solving approach is the same. Once a medical problem is unearthed, we prescribe appropriate treatment. The same holds for businesses. A practice

Online Library Microeconomic

may not need an antibiotic injection, but an infusion of capital might be just what the doctor orders for an outdated facility.

Finally, once the problem is corrected, we periodically monitor the patient with wellness exams, assuring continued health.

Businesses are no different. We continue

Online Library Microeconomic

to take their vital signs, benchmark them against established "normals" and make sure that they continue on a healthful trend. What could possibly be a more natural extension of expertise than applying the same care to practice management as patient management?
