different periods on the periodic table, which may indicate that they react differently. 2.) List the four metals from most reactive to least reactive. Use data from your lab to support your answer. Zinc (most reactive) Magnesium Calcium Tin (least reactive) (refer to tables for evidence) 3.)

Periodic Trends in Reactivity - Bonnie May's Digital Portfolio

Properties and Trends in Transition Metals. The elements of the second and third rows of the Periodic Table show gradual changes in properties across the table from left to right as expected. Electrons in the outer shells of the atoms of these elements have little shielding effects resulting in an increase in effective nuclear charge due to the addition of protons in the nucleus.

23.1: General Properties of Transition Metals - Chemistry ...

For this part of the experiment you will make a graph of a periodic property vs. atomic number. The property chosen is atomic radius, given in pm (1 pm = 10⁻¹² m). The atomic radius, r , is related to the volume of the atom by the formula of a sphere, $V = 4/3 r^3$. In Table 1 below, the atomic radii of the first 54 elements are given.

EXPERIMENT 4 – The Periodic Table - Atoms and Elements

Mar 24, 2014 - ...all things were created by Him and for Him. Colossians 1:16
These experiments and demonstrations have been proven in our homeschooling of ages 6-13. If we didn't have an experiment for each element, we supported our study with a related article, a household object to represent the element in our "element box"
