Liz Culkin and Hugh Staynback experience love at first sight while students at Rutgers College in New Jersey, in 1948. Glorifying in their first experience in romantic love, they are convinced that no power on earth could ever come between them. Of course, they are mistaken, as Hugh's commitment to his invalid mother coupled with his other family members' refusal to commit themselves to such an intrusion into their lives, leads to a truly heartbreaking separation of the lovers. This tale traces their lives, alternately, over a span of twenty years during which time they experience the good and the bad, with the latter, especially in Liz's case, being the dominant condition. As a high school principal she becomes

entangled with a succession of men of power who resent her success in a male-dominated society and her fierce determination to stand by her principles regardless of the cost to herself. While she is surviving these twenty years, she often longs for the love and devotion she thought she had found in Hugh, who also experiences many difficult years, especially when he is exposed to the ravages of war in Korea. It is during those most difficult years when he frequently immerses himself in his memories of Liz and of the ecstatic love they once shared. Then, one day in 1972 Hugh decides that he must find Liz, and he launches his search in a most unorthodox manner, by reserving a banquet room in a facility in Hackensack, N.J., where he fully intends to be a groom at a wedding reception in the near future.

This book is a project toward the continuing theme of the Islamic worldview of economy-society-institution interactions in national and international forums, wherein individual and group preferences are created and sustained by the regeneration of knowledge into higher levels of realising truth. Truth and the medium of knowledge for realising higher levels of truth, are argued to be the only most immutable character of all systems.

Do your salespeople feel under extreme pressure to retain accounts or gain new business at any cost? If so, you may be leaving big money on the table. Consider the integrated-circuit supplier representative who lost \$500,000 of potential profit on a single transaction, just to "win" a deal that he would have closed anyway at the higher price. Do not make price concessions. Become a value merchant instead. In this authoritative book, James Anderson, Nirmalya Kumar, and James Narus explain how companies in business markets can use customer value management techniques to estimate the value of your market offerings, create value propositions that resonate with your customers, and maximize the return you will get on the superior value that you deliver. Drawing on extensive research and detailed case studies of companies like Sonoco, Tata Steel, and Quaker Chemical, Value Merchants will change the mindset and behavior of your executives, sales management, representatives, and marketers—as well as your customers.

The Qur'an is the foundational sacred text of the Islamic faith. Traditionally revered as the literal word of God, its pronouncements and discussions form the bedrock of Islamic beliefs and teachings. Notwithstanding its religious pre-eminence and the fact that it is the sacred text for over one billion of the world's Muslims, the Qur'an is also considered to be the matchless masterpiece of the Arabic language. Its historical impact as a text can be discerned in all aspects of the heritage of the

Arabic literary tradition. Over recent decades, academic engagement with the Qur'an has produced an impressive array of scholarship, ranging from detailed studies of the text's unique language, style and structure, to meticulous surveys of its contents, concepts and historical contexts. The Oxford Handbook of Qur'anic Studies is an essential reference and starting point for those with an academic interest in the Qur'an. It offers not only detailed reviews of influential subjects in the field, but also a critical overview of developments in the research discourse. It explores the tradition of Qur'anic exegesis and hermeneutics, making it a comprehensive academic resource for the study of the Qur'an. No single volume devoted to such a broad academic survey of the state of the field currently exists.

This book is a study of religious principles of good governance in our contemporary societies. Historically, religion has provided guidance for organizing societies. In modern times, however, religious ideas have been marginalized in social science literature. Contributors to this work explore what values and practices the Qur'an can contribute to governing our economic, political, and social life today.

Contact between Islam and the West is 1400 years old. Both sides have had more than adequate time to become familiar with the other. Yet the world is still arguing about Islam's teachings. Is Islam peaceful? Does it commend violence? Does Islam respect "the other"? Does Islam abuse women? Is Islam anti-Semitic? Does Islam teach the Torment of the Grave? Does Islam recommend the beating of wives? Do

Muslim Scriptures commend Temporary Marriage of Pleasure? Did Zayd divorce Zaynab because he had no further need of her? All these questions are easy to settle for anyone who can read Islamic Scripture in Arabic. The author of this book is such a person. However, to answer all these questions in the affirmative would do the image of Islam much damage in the West, where Islam is keen to present a polished image, especially in the light of much violence committed in its name against westerners. Muslim leaders, and their allies in the West, have popularised a distinction between Muslims and Islamists, in order to distance Islam from thousands of heinous Muslim crimes such as the Charlie Hebdo massacre. Are the English translations of the Qur'an faithful to the original Arabic? Or are they part of the charm offensive Muslim Petro-dollars have financed for years, through sponsorship of university departments of Islamic studies, investing in western media and publishing, building Islamic centres and financing Islamic societies and pressure groups throughout the West. This work gives English readers the ability to access the original Arabic of the Qur'an and hadith, and see the true face of Islam, without its face powder. It is hoped that this work will assist free thinkers to form their own opinion of Islam, based on the true Qur'an, without interference from Muslim propaganda or any agenda driven discourses.

In The Destruction of Sodom, the Biblical account of the destruction of Sodom and Gomorrah is examined under the spotlight of modern science against a cultural backdrop of history and archaeology. In this scientific reconstruction, the account

of events described in the book of Genesis is verified and it is established that the destruction occurred at about 2350 BC as a result of an earthquake-induced landslide transporting Sodom to the depths of the Dead Sea. Strands of geography, geology, and engineering science are drawn together to provide comprehensive treatment of all relevant scientific aspects pertinent to a rational understanding of the mechanics of the disaster. The detailed scientific argument follows a discussion of the Genesis account and considerations of Canaanite culture and commerce, with specific attention to the trade in bitumen. On this point, Graham Harris provides evidence that the mainstay of Canaanite commerce was the exploitation of the bitumen resources of the Dead Sea, that the Sodomites were among the world's first chemical engineers, and from the resources of the region a large number of processed materials also would have been exported to Egypt. The Destruction of Sodom is an example of the application of science to a fuller understanding of one of the most intriguing events of the Old Testament, and will be of direct interest to scholars as well as to the wider public.
