Back in 1997, William Strauss and Neil Howe released *The Fourth Turning: An American Prophecy* that articulated a roughly 80-year generational cycle of history based on 'four turnings' dating back to the Wars of the Roses starting in 1459, climaxing in 1485. That initial crisis was followed by the Armada Crisis from 1569 to 1588, the Glorious Revolution from 1675 to 1689, the American Revolution from 1773 to 1781, the Civil War from 1860 to 1863, and the Great Depression and World War Two ...

Finally, the fourth turning is a crisis; some unexpected major event that will involve everyone and completely change the way people think from before the crisis occurred to after it ends. Then the cycle begins again with a new high. Each turning is led by a generational archetype, also cyclical. The high is led by an Artist generation.

**NATIONAL BESTSELLER** • "A startling vision of what the cycles of history predict for the future."—USA Weekend William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America's past will predict its future. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four eras—or "turnings"—that last about twenty years and that always arrive in the same order. In *The Fourth Turning*, the authors illustrate these cycles using a brilliant analysis of the post-World War II period. First comes a High, a period of confident expansion as a new order takes root after the old has been swept away. Next comes an Awakening, a time of spiritual exploration and rebellion against the now-established order. Then comes an Unraveling, an increasingly troubled era in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. Together, the four turnings comprise history's seasonal rhythm of growth, maturation, entropy, and rebirth. *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for America's next rendezvous with destiny.

Is massive change coming in the form of...? THE FOURTH TURNING? Read on and decide for yourself! Immerse yourself in this summary and analysis of *The Fourth Turning* by William Strauss and Neil Howe. Let me give you the list of Strauss and Howe's popular book: *The Fourth Turning* insists that events in history follow a predictable cycle. By looking at Anglo-American history over an extremely long span, one can conclude that there are in fact distinct cycles that can be measured and described. Each of these cycles is made up of turnings, or time of societal change. They each typically last around 20 years. Reaching back to the Etruscans and early Roman Empire, the authors explain how these civilizations first linked the cycles of human life and the cycles of history to the passing of the seasons. They explain that a year passes through four seasons. There are birth and generation in the spring and summer, and harvest and death in the fall and winter. They explain that the span of human generations and empires are similar. Strauss and Howe describe how a saeculum (an approximately 80-year period) encompasses four historical/cultural rhythms. This idea comes from the early Romans - their empire itself was believed to be destined for a fixed number of 100 years and indeed the Roman Empire did follow this prediction. They even took into account accidents of nature and outside invasion. Each of the four cycles contains different generations, which each have their own distinct place in their civilization's drama. Are you ready to learn about these dramas, and much more in this summary based on *The Fourth Turning: An American Prophecy*? Hailed by national leaders as politically diverse as former Vice President Al Gore and former House Speaker Newt Gingrich, *Generations* has

been heralded by reviewers as a brilliant, if somewhat unsettling, reassessment of where America is heading. William Strauss and Neil Howe posit the history of America as a succession of generational biographies, beginning in 1584 and encompassing every-one through the children of today. Their bold theory is that each generation belongs to one of four types, and that these types repeat sequentially in a fixed pattern. The vision of Generations allows us to plot a recurring cycle in American history -- a cycle of spiritual awakenings and secular crises -- from the founding colonists through the present day and well into this millenium. Generations is at once a refreshing historical narrative and a thrilling intuitive leap that reorders not only our history books but also our expectations for the twenty-first century.

Summary of The Fourth Turning The Fourth Turning is a book by William Strauss and Neil Howe. It outlines the foundation for what is now known as Strauss-Howe generational theory. The main tenet of the book is that American and global history follows a generational cycle. The cycle is defined by four "Turnings," each lasting about 20 years. Generational archetypes play a crucial role in historical events, and these archetypes recur. The cycle of the four "Turnings" is called a "saeculum" and is roughly the length of human life. The book offers a detailed description of the underlying philosophy. The key idea is seasonality. The authors offer their findings from nature and history to claim that the cyclical nature of time permeates all life, including American history. Furthermore, the authors analyze Anglo-American history to find patterns in a generational attitude. They then correlate these characteristics to the historical events of significance. The evidence that the authors present focuses on their interpretation of key historical figures, as well as societal attitudes. The cyclical generational attitudes are the prime factor in analyzing history and politics, according to Strauss and Howe. The authors claim that race, gender, economic class, religion, and political beliefs are all less influential in determining the course of history. This claim is controversial, and authors reflect on their stance against other prominent academics, offering some comparison with several secondary sources. Overall, the evidence that the authors present is highly subjective and is not sufficiently bolstered with verifiable sources. Each generation is presented as having a unified voice, with few acknowledgments of a diversity of thought within each generational group. Therefore, the predictions are not based on solid evidence. Rather, the book puts forward a theory of generational seasonality. The authors explore what this theory could mean, but they do not offer a sufficient basis for their findings.
