- partsstop.com

A Good Samaritan hoping to return the drive or a penny pincher hoping to pocket a new device for free inserts the “found” drive into his or her computer’s USB port. Then the trouble begins. There are three main types of attack:
Malicious code — In the

Acces PDF Thumb Drive

most basic of USB drop attacks, the user clicks on one of the files on the drive. This unleashes a malicious code that automatically activates upon viewing and can download further malware from the Internet.

The problem is that the hackers change a log file that makes the flash drive think it has more memory than it does.

When you receive the drive, if you right click and go to properties it will display a larger amount of memory than it really has- so when you put data on it that
