Tutorials in introductory physics homework solutions are a series of resources and materials designed to supplement class work and the existing textbooks in physics. They are formulated, not to help the student solve physics problems, but to equip them with basic physics concepts. Like finance homework solutions, it also equips them with reasoning skills necessary for application of physics concepts.

Introduction Physics Tutorials is an education site that includes general physics topics. Students at high schools and university can find any physics subjects in this site. Since vectors are basic of most of the physics subjects, we choose it to be first topic of this site.

Introduction

The tutorial can be used with any of the major introductory physics texts. Collaborative learning—Intended to be used in a small-group environment of three to four students. Each topic includes a sequence of worksheets and assignments: Pretests—Short, free-response qualitative questions that test understanding of basic physics concepts. These are usually administered after material has been covered in lecture and prior to the tutorial.

Lecture-Tutorials for Introductory Astronomy provides a collection of 44 collaborative learning, inquiry-based activities to be used with introductory astronomy courses. Based on education research, these activities are "classroom ready" and lead to deeper, more complete understanding through a series of structured questions that prompt you to use reasoning and identify and correct their misconceptions. All content has been extensively field tested and six new tutorials have been added that respond to reviewer demand, numerous interviews, and nationally conducted workshops.

Written as a collection of problems, hints and solutions, this book should provide help in learning about both fundamental and applied aspects of this vast field of knowledge, where rapid and exciting developments are taking place.

A practical introduction to network science for students across business, cognitive science, neuroscience, sociology, biology, engineering and other disciplines.
